IN THE CLAIMS

The following is a listing of the claims in the application with claims 1 and 2 shown as currently amended.

LISTING OF CLAIMS:

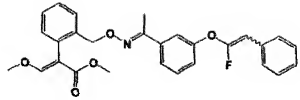
1. (currently amended) The fungicidal composition, which comprises:

(i) an agrochemical selected from the group consisting of methyl (2*E*)-3-methoxy-2-[2'-[[[3''-(1'''-fluoro-2'''-phenyl-1'''-ethenyloxy) phenyl]methylimino]oxy]methylphenyl]propenoate of Formula I); *N*-methyl(2*E*)-2-methoxyimino-2-[2'-[[[3''-(1'''-fluoro-2'''-phenyl-1'''-ethenyloxy)phenyl] methylimino]oxy]methylphenylacetamide of Formula (II); and a mixture thereof, and

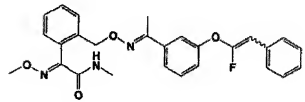
(ii) ~~an~~ one or more ~~adjuvant~~ adjuvants for enhancing the fungicidal efficacy, selected from the group consisting of: a nonionic surfactant selected from the group consisting of: ~~a polyoxyethylene-based nonionic surfactant consisting of: a lipophilic moiety being an aliphatic alcohol, a fatty acid or a triacyl glyceride, containing at least 8 carbon atoms, and a hydrophilic moiety being a polyoxyethylene having 3 to 25 oxyethylene repeating units; ethoxylated caster oil; polyoxyethylene-polyoxypropylene block copolymer; and a mixture thereof;~~ ~~an anionic surfactant selected from the group consisting of sodium dioctyl sulfosuccinate, sodium dodecylbenzenesulfonate and a mixture thereof~~ polyoxyethylene lauryl ether, polyoxyethylene isododecyl ether, polyoxyethylene tridecyl ether, polyoxyethylene cetyl ether, polyoxyethylene stearyl ether, polyoxyethylene oleyl ether, polyoxyethylene monolaurate, polyoxyethylene monostearate, and polyoxyethylene monooleate, which have 3 to 25 oxyethylene repeating units; and sodium dioctyl sulfosuccinate; and

a fatty acid alkyl ester;

wherein said agrochemical and said adjuvant for enhancing the fungicidal efficacy being mixed in a ratio range from 1:0.5 to 1:20 by weight:



(I)



(II)

2. (currently amended) The composition of claim 1, wherein the adjuvant for enhancing the fungicidal efficacy is selected from the group consisting of a nonionic surfactant selected from the group consisting of ~~a polyoxyethylene-based nonionic surfactant consisting of a lipophilic moiety being an aliphatic alcohol, a fatty acid or a triacyl glyceride, containing at least 8 carbon atoms, and a hydrophilic moiety being a polyoxyethylene having 3 to 25 oxyethylene repeating units, a polyoxyethylene-polyoxypropylene block copolymer containing 2 to 40 oxyethylene and 25 to 45 oxypropylene repeating units and a mixture thereof; an anionic surfactant selected from the group consisting of sodium dioctyl sulfosuccinate, sodium dodecylbenzenesulfonate and a mixture thereof; and fatty acid alkyl esters having at least 14 carbon atoms~~ polyoxyethylene lauryl ether, polyoxyethylene cetyl ether, polyoxyethylene stearyl ether and polyoxyethylene oleyl ether, which have 3 to 25 oxyethylene repeating units.

3. (original) The composition of claim 1, which further comprises another agrochemical for preventing or treating plant diseases.

4. (Previously Withdrawn) An adjuvant composition for enhancing the fungicidal efficacy of an agrochemical of compound of Formula (I) or (II) against plant diseases, which comprises:

(a) an effective amount of one or more adjuvant for enhancing the fungicidal efficacy selected from the group consisting of a polyoxyethylene-based nonionic surfactants which has an aliphatic alcohol, a fatty acid or

triacyl glyceride as a lipophilic moiety containing at least 8 carbon atoms and a polyoxyehtylene as a hydrophilic moiety having 3 to 25 oxyethylene repeating units; a polyoxyethylene-polyoxypropylene block copolymer containing 2 to 40 oxyethylene and 25 to 45 oxypropylene repeating units and a mixture thereof; an anionic surfactant selected from the group consisting of sodium dioctyl sulfosuccinate, sodium dodecylbenzenesulfonate and a mixture thereof; and fatty acid alkyl esters having at least 14 carbon atoms;

(b) an emulsifier or dispersant; and

(c) a carrier.

5. (Withdrawn) A method for using a fungicidal composition as defined in claims 1 or 2 for preventing or treating a plant disease~~,~~ which comprises spraying the composition at a concentration of 4 to 400 mg/l of the agrochemical or 50 to 2,000 mg/l of the adjuvant for enhancing the fungicidal efficacy to said plant.
